

Winter Floods (again!)

Posted on **November 8, 2016**

Carter Pumps has a range of flood mitigation products and services, from simple emergency pump deployment to more permanent attenuation and pumping solutions.

As we approach the winter months, yet again householders and businesses find themselves facing the prospect of floods. The winter of 2013/14 saw the worst groundwater flooding in Dorset, Wiltshire and Hampshire for over ten years.

Self-priming petrol driven pump

- Suitable for temporary deployment
- Can be used when power is down
- Portable
- Rigid suction hose, foot valves and strainers available

Submersible electrical motor driven pump

- Suitable for temporary deployment
- Requires electrical supply
- Portable
- Discharge hose and quick couplers available

Puddle Sucker electrical motor driven pump

- Suitable for temporary deployment on a flat surface
- Starts at 5mm water depth and pumps down to 2mm
- Requires electrical supply
- Portable
- Discharge hose and quick couplers available

Prefabricated Lifting Stations

- Suitable for permanent installation
- Requires installation of tank in ground, plumbing of discharge pipework and an electrical supply
- Reliable, automatic operation
- Twin pump options for duty / standby

Generators

- Back-up power supply
- Suitable for temporary or permanent installation
- Can be configured to auto start on mains failure

Whatever flood mitigation measures you are considering we would be pleased to hear from you. From supply of a single submersible drainer pump to the installation of a submersible pump station, groundworks, electrics and alarms we have the expertise to help.
