

PRESS RELEASE

DATE: 09/10/2025

TITLE: ABL Circuits Unveils New Website Built to enhance the customer's experience.

A fresh new site delivers speed, clarity, and a better experience for engineers and manufacturers.

In an industry where every hour counts, ABL Circuits has relaunched its website to make it easier than ever for customers to connect, learn, and get moving on their PCB projects.

The updated site features a sleek new look and an intuitive layout that makes it easier for customers to discover how ABL Circuits supports their projects, from initial enquiry through to delivery.

“Our website is often the first place people meet us, so it was important that it truly reflects who we are,” said William Leverett at ABL Circuits. “We wanted to create a platform that not only looks modern and professional, but also makes it easy for visitors to understand what we offer and how to work with us.”

Highlights of the new site include:

- A modern, mobile-friendly design for smoother browsing
- Improved navigation to help visitors quickly find the information they need
- Expanded content giving a clearer picture of ABL Circuits’ services and strengths
- Case studies and insights showcasing how ABL supports customer projects
- A more streamlined way to request quotes or technical advice

The launch marks another step in ABL Circuits’ commitment to making it simple and stress-free for customers to connect, learn, and collaborate.

The new site is live now and can be explored at www.ablcircuits.co.uk

ABOUT ABL CIRCUITS

Based in Baldock, Hertfordshire, ABL Circuits has been delivering PCB prototyping and assembly solutions across the UK and beyond since 1983. Known for its speed, reliability, and customer-first approach, ABL Circuits continues to invest in tools and resources that make projects simpler, faster, and stress-free.
