

3D Prototype Printing Service

The Plastic People are offering an exclusive 3D Prototype Printing Service for our customers. For prototyping and visualisation for small batch designs produced at a cost-competitive prices with outstanding results.

This service would suit any small business, start-up or individual creating specialist parts, exclusive prototypes and bespoke models. Once uploaded and tested your design can be easily re-produced whether it's a one-off or a small batch run.

We have extensive experience meeting a diverse range of 3D printing requirements, from prototyping to production: Visual aids, concept models, injection molding prototypes, form-fit & function prototypes, tooling and casting patterns, jigs, grips and fixtures.

All we need from you is a design file (DWG/CAD) to work from to provide a realistic quote and turnaround time. If you don't possess a DWG/CAD file we can generate one for you (quote required).

Key Features

- Upload your file to get a quote.
- Maximum size is 250 x 250 x 250mm (currently).
- Choose from a wide range of colours & finishes.
- Variety of thermoplastics available.

Contact us for a no obligation quote!
