

## Pool Surround and Pathway in Twyford

### Project Intro

In 2013 we were contracted by Neptune Swimming Pools of Hampshire to lay a surround for a swimming pool they had recently installed at a newly built Coach House in Twyford.

In 2015, with landscaping now complete, we were contracted directly by our customer to lay a garden footpath.

For both installations the most important requirements were for a pretty, practical, environmentally friendly surface that complemented the adjoining garden design, the new home and brick built pool house.

### Solution

SureSet was chosen for its permeability - allowing water to drain through minimising puddles and the potential to slip and for its smooth, stone free finish - eliminating the potential of stones migrating in the pool and lawned area.

In 2013, on a cured and primed concrete base we hand laid 3mm Barley Beach carefully accommodating the maintenance drains and filters around the pool.

In 2015, on a cured and primed concrete base we installed a 3mm Barley Beach pathway leading from the pool and around the solar panels.

### Result

The result is a stunning looking swimming pool surround that sits in perfect harmony with the nearby buff coloured bricks of the pool house.

#### **But it's not just pretty...**

Choosing SureSet ensures these surfaces are seamlessly smooth, puddle free and extremely comfortable underfoot. With virtually no maintenance and a 15 year guarantee, the owner of this fabulous new Coach House was totally impressed with the natural look of their new swimming pool surround and footpath.

**\*We now issue 18 year guarantees with every SureSet installation**
