

## The Flexible Aluminium Profile System For A Range of Applications

The MiniTec aluminium profile system is flexible and can be used for a massive range of applications including machine frames, safety guards, workstations, conveyors, complete turn-key assembly lines and multi-axis positioning systems.

MiniTec UK Ltd supply a comprehensive range aluminium profile system and matching modular building components throughout the UK and Europe and work with some large names, supplying bespoke solutions to industry.

At the heart of the MiniTec aluminium profile system is the unique Powerlock® fastening method which requires no specific preparation, pre-machining or special tools. The fastening system is well proven for simplified design, rapid assembly and also allows re-usability.
