

ZOUCHGLAZINGMOUNT 400 tape takes structural glazing industry by storm

Zouch Converters' superior strength polyurethane foam tapes have been used industry-wide to provide high performance spacers and thermal breakers on a variety of residential, commercial and industrial projects. The foam tape has been fitted to thousands of glass, steel and anodized aluminium windows and continues to strengthen its presence in the construction industry.

ZOUCHGLAZINGMOUNT 400 is the tape of choice in today's building trade due to its outstanding performance and reliability credentials; from high profile hotels to personal building projects, this tape excels in its field. As well as being able to offer a breathable open cell foam structure that reduces heat transfer and inhibits condensation on fenestration systems, ZOUCHGLAZINGMOUNT 400 offers excellent resistance to oxidation, weather and fungal growth.

ZOUCHGLAZINGMOUNT 400 is the ideal constituent to help maintain vital spacing in structural glazing systems. The superior quality of the double sided adhesive ensures that it can accommodate for stability whilst silicone elements cure. Quick and easy-to-apply, the Zouch Sales Team are happy to discuss your needs so give them a call on 0115 9886295!
