Valentines Day

Where does the time go? 2017 still feels like yesterday but here we are already with Valentine's day. Recognised across the globe as the day of Romance, many loved up couples will exchange gifts and cards whilst others will confess their affection to each other for the first time. If you're lucky enough to be given a gift this year, keep an eye out for any foam inserts within as it's very possible Zouch have played a key part in making sure your gift was kept safe in transition. While we are here, we would love to express our own gratitude and appreciation for all our suppliers, clients and future customers.

Foam Comfort

During this month of romance you can expect at some point to be cuddled up to a loved one with a bottle of wine. Whether that be on your sofa or in bed there's a good chance you'll be relaxing on some nice, soft, comfortable foam as there is nothing that says relax more. However, while this is common knowledge when it comes to foam application, little do people know that our foam can be found in Trampoline parks, boxing rings, packaging, insulation, cosmetics and sealants amongst many other products.

Featured Product

ZOUCHefoam IXPE 30 eaves fillers are an efficient way of maintaining the stability of a roof against strong winds. They also allow enough air flow to circulate around the building to avoid the build-up of condensation with lower levels of humidity in the batten cavity. Zouch Converters have been in the business of manufacturing eaves and ridge foam to the UK and beyond for a number of years now. Every project is treated as bespoke with an experienced and knowledgeable member of the team at hand to guide you through the process. ZOUCHefoam IXPE 30 eaves fillers are manufactured in high quality PE (Expanded Polyethylene), EPDM faced polyethylene and EPDM and can be made to suit any profile and all applications.

Winter Olympics

The winter games are here once more. After a 4 year wait since the games in Russia, it is now the turn of South Korea to host the historic competition. With a huge nine hour time difference however, the likelihood that many of us will be witnessing the majority of events live is slim although we applaud those of you with the dedication to commit to all nighters. Here at Zouch, we're very proud of the work we do within the sport sector. With many events being high risk due to the immense speeds competitors go and the terrifying heights they reach it makes sense that their protection is of the highest quality. Look closely and you'll see foam all over them from their helmets down to their shin pads. You'd be surprised where you'll find our foams!
