

# Crouzet PBX-R Positive-Action Microswitch

March 25, 2024

The PBX-R is a robust and reliable positive-action microswitch for low and medium power ranges and the harshest environments. Equipped with self-cleaning V-shaped contacts, incredibly durable and robust, the PBX-R offers numerous advantages.

-  **CERTIFIED**
-  **DURABLE**
-  **RELIABLE**
-  **HIGH-RESISTANCE**

Approved by leading international railway organizations and meeting the most stringent standards, the PBX-R is an ideal choice for a wide range of applications in the rolling stock such as master controller, emergency break and circuit breaker, and for the railway infrastructure like the switchgear, automatic barrier, earth switch and more.

The PBX-R also offers numerous advantages for engineering and design departments wishing to use it on a project:

- Ease of use: The PBX-R is easy to install and operate.
- Reliability: The PBX-R is a robust, reliable product that can withstand the most rigorous tests.
- Easy integration: With the highest positive residual stroke on the market (2.05 mm vs. 0.15 mm for competitors), the PBX Railway makes it easy to integrate into designs and applications, reducing the set-up process.
