## Carrs celebrate 15 year collaboration with Rofin-Baasel

When German industrial laser specialist Rofin Sinar Laser GmbH was founded in 1975, the company which was to become the UK's largest independent laser welding operation was but a figment of Phil Carr's imagination.

However, the German company's move to establish a stronger UK presence in 1998 coincided with Carr's own decision to specialise in laser welding and this sparked off a solid partnership which celebrates its 15th anniversary this year.
