

Churches: gentle heat for comfortable gatherings

Customer brief

To improve the cost efficiency and effectiveness of the church heating.

Background

This Methodist Church had three 4 kW electric convector heaters that were proving to be inefficient in heating the public space.

Solution

- The existing three convector heaters were removed and replaced with two 0.89 kW infrared heaters
- Picture panels were installed.

Results

- ✓ Easy installation
- ✓ Improved efficiency and lower running costs
- ✓ Picture panels were personalised to allow the Church to use the heaters for Church messages.
