

Bars/Restaurants: stylish, innovative & effective space heating

Customer brief

Heat a large open space without detracting from the overall architectural style.

Background *Quayside Restaurant & Bar Ipswich*

Quayside is a waterfront bar and its owners wanted a heating system that fitted in with its modern interior design and created a warm atmosphere.

The pub is a large space so key requirements were to eliminate draft spots and cold areas with economical running costs.

Solution

- The predecessor to the Herschel 3.6 kW Pulsar Infrared Ceiling Heaters was chosen to heat the space.
- Finished in high quality vitreous enamel it compliments the mix of retro, vintage and contemporary light fittings.

Results

- ✓ The heaters have created a warm ambience eliminating drafts and cold corners
- ✓ Energy costs are effectively managed by timer controls and thermostats
- ✓ Heaters suspended from ceiling so no loss of valuable trading floor space

“They fit the bill perfectly. It was always a challenge to heat such a large open space. They are economical & look stylish & trendy. One happy customer described them as outstanding”.
