

## Cottages: cost effective heating for chillier homes

### Customer brief

To refit the premises with a heating solution that heated the cottage and did not detract from the surroundings.

### Background

Blake Hall is a restored 17<sup>th</sup> century barn for use for weddings. The owners of Blake Hall had recently installed our heaters within their wedding venue. They subsequently approached us to look at the heating within their accommodation cottages as they were so pleased with the results of it within Blake Hall.

### Solution

- Herschel Inspire panels were ceiling-mounted;
- These enabled a consistent temperature to be maintained.

### Results

- ✓ The heaters blend in with the décor and are difficult to spot which is what the owners wanted
- ✓ More wall space is available for furnishings
- ✓ Thick cottage walls are kept dry and warm.

“The heaters in the barn are absolutely fantastic. I can not tell you how pleased we are with them. They are working better than we could ever imagine”.

Product Used: Herschel Select Ceiling
