To All this May Concern

OBERLIN FILTER LIMITED – BREXIT – Review of current Procedures and Future Risk Mitigation

Oberlin Filter Limited supply their customers in the UK and Europe in 4 main categories:

Filtration Systems, Filter Media Rolls, Machine Spares, Service and Commissioning.

In respect of meeting required delivery of Filtration Systems, currently build times run at 12 – 16 weeks, the long lead parts of the assembly coming in from the USA and Europe. As we build each filtration as a bespoke piece of equipment, we cannot anticipate what equipment will be required, however we are aware that there may be delays in customs clearance that may extend lead times on the imported items.

Oberlin Filter Limited supplies of Filter Media Rolls and Machine Spares for the Oberlin Filtration Systems are imported from the USA. The UK Oberlin site currently holds 3 months of projected sales stock; however, we are moving towards housing 6 months of stock based upon previous sales reports. Oberlin Filter Limited will always endeavour to ensure supply as promptly as required.

Oberlin Filter Limited will ensure that it meets all work permit/visa requirements when arranging work to be carried out on Oberlin Filter Systems located outside of the U.K.

If you have any questions regarding this statement please do not hesitate to contact us via email or telephone, we are always here to help.
