

Why Buy Kenburn Waste Baler and Compactor Consumables

When it comes to waste management equipment and consumables, Kenburn is your one-stop solution. We offer a wide range of products designed to work seamlessly with our waste handling equipment, such as compactors and balers.

But why choose Kenburn?

Extensive Range of Consumables

At Kenburn, we pride ourselves on supplying a comprehensive range of baler and waste compactor consumables. Our product range includes baling wire, strapping, and baling twine for use with our balers, as well as Roto Compactor bags available in both round and square formats, and in standard or heavy-duty strengths.

In addition to our core [consumables](#), we also offer racks and rack-bags for general usage, along with a variety of accessories to make your waste management tasks easier. These accessories include bale trolleys and baler cord hooks, ensuring that you have everything you need to keep your waste management operations running smoothly.

We supply businesses across the UK.

Quick and Efficient Delivery

We understand that when you need consumables, you need them fast. That's why we offer same-day despatch for all orders placed before 1pm, ensuring that your products are on their way to you as quickly as possible. Additionally, we provide next-day or three-day delivery service options to any location within mainland UK.

As a bonus, if you spend more than £500.00 on your order, we offer free three-day delivery within mainland UK (excluding the Scottish Highlands). For delivery charges to the Scottish Highlands and islands, Northern Ireland, and other islands within Great Britain, please contact us for more information.

Flexible Payment Options

At Kenburn we want to make the purchasing process as simple as possible for our customers. That's why we offer multiple payment options when you check out online. You can choose to pay using your debit or credit card, or if you prefer, you can select to be invoiced on account (subject to credit application and approval).

Expert Advice and Support

If you need assistance in identifying the right product for your specific waste management requirements or have special requests, our team of experts is just a phone call away. You can reach us at [01727 844988](tel:01727844988), [and we'll be more than happy to help you find the perfect solution for your waste handling needs.](#)

Waste Baling Twine and Straps

Baling straps and twines are essential components for efficient waste management when using small and medium-sized balers. Offering a cost-effective and flexible alternative to baler wire, baling straps may not be as strong, but they can absorb greater shocks if your bales are subjected to rough handling. Polypropylene strapping is an economical choice that provides high-performance strapping for light, medium, and some heavy-duty applications across various industries.

Our baler straps are available in an array of widths and lengths to accommodate every vertical baler: 9mm, 13mm, 16mm, and 19mm. In addition, we supply 4-ply baler twine in 180m lengths, perfect for small balers.

[Our baling straps](#) are suitable for a wide range of vertical balers, including Bramidan, CK International, Compact and Bale, Dicom, Dicom Paal, Dixi, Europress, Gradeall, HSM, Kenburn Select, KK, Landfill Alternatives, LSM, Mardon, McFab, MHM, Miltek, Orwak, Paal, Pakawaste, Phoenix, PHS, QCR, Strautmann, and Werkit.

Small balers typically utilise either 9mm straps or 4-ply twines, while medium-to-large sized balers require 13mm or 16mm straps. For the Kenburn Balex 30 carpet crusher, we recommend using a 16mm strap. Larger, mill-sized balers are best suited for baler wire or heavy-duty (19mm) straps.

Premium Waste Baling Wire Solutions

At Kenburn, we offer a diverse selection of high-quality baler wire to suit your specific waste management needs. Our inventory includes:

- 4m, 4.5m, and 5m cut and loop lengths
- 20-25kg and 40-45kg rewound coils
- 1000kg formers (contact us for pricing and availability)
- Quicklink wire (contact us for pricing and availability)

Our baler wire is made from black annealed mild steel and manufactured to BS1052 standards. The annealing process ensures a superior surface quality and consistent tensile strength, making it the ideal choice for baling applications.

Our baling wire is compatible with most balers, including Bramidan, CK International, Compact and Bale, Dicom, Dicom Paal, Dixi, Europress, Gradeall, HSM, Kenburn Select, KK, Landfill

Alternatives, LSM, Mardon, McFab, MHM, Miltek, Orwak, Paal, Pakawaste, Phoenix, PHS, QCR, Strautmann, and Werkit.

High-Quality Compactor Bags

Kenburn offers a comprehensive selection of [compactor](#) sacks, designed for use with all Bergmann Roto Compactors. Our range includes bags for both round and square machines, available in standard or heavy-duty strength options:

- Standard or Heavy Duty bags for round roto compactors (supplied in flat packs of 20 bags)
- Standard or Heavy Duty large bags for square roto compactors (supplied on rolls of 35 bags)
- Small bags for the square PS800 roto compactors (supplied in rolls of 50 bags)

In addition to our compactor bags, we also provide racks and rack-bags for general usage, along with a variety of accessories such as bale trolleys and baler cord hooks to enhance your waste management operations.

Racks & Rack Bags

Recycling racks simplify the waste sorting process by allowing you to segregate different types of waste efficiently. For example, you can dedicate a separate rack for plastic wrapping and packaging waste, ensuring that your cardboard remains contaminant-free and ready for recycling.

Racks are also an effective way to maintain a clean and organised workspace and can help you to save time and therefore money. Strategically place them at key points throughout your production area to keep clutter at bay. Once the bags are full, they can be effortlessly removed and transported to your baler or compactor for further processing.

At Kenburn, we prioritise your convenience by offering rolls of 10 bags designed to fit our racks seamlessly. Optimize your waste management process with our reliable and user-friendly racks and rack bags.

Bale Trolleys and Cord Hooks

Efficient waste management requires not only high-quality balers and compactors but also a variety of supportive accessories to ensure optimal performance, including bale trolleys and cord hooks.

Transporting bales can be labour-intensive and time-consuming. Our durable bale trolleys are designed to simplify this task, allowing you to move heavy bales with ease. These trolleys not only reduce the manual effort required but also minimize the risk of workplace injuries. Available in various sizes and configurations, our bale trolleys cater to a wide range of balers and waste materials.

Securing bales is a crucial aspect of waste management, ensuring that your compacted waste remains intact during transportation and storage. Our bale cord hooks provide a reliable solution

for fastening baling cords or wires, keeping your bales secure and stable. These hooks are easy to use, durable, and compatible with a range of balers and baling materials.

At Kenburn, we understand that each waste management operation is unique, which is why we offer a diverse selection of accessories tailored to your specific needs. By incorporating these accessories into your waste management process, you can optimize efficiency, enhance safety, and ultimately, achieve better waste handling outcomes.

You can purchase these baler and compactor accessories and consumables from our website, take a look at our [online shop](#).
