

# TVI INVESTS IN SOLIDWORKS 3D DRAWING SOFTWARE

We have invested in the latest SolidWork's 3D CAD design and modelling software to complement our existing AutoCad drawing software. This upgrade will allow our drawing office to produce even more detailed and comprehensive engineering drawings, adding the capability to create 3D models to better visualise projects.

Our drawing office works in conjunction with sales and manufacturing to design bespoke storage and process solutions for our customers, from the initial concept to final installation.
