

press release

FOR IMMEDIATE RELEASE – 10 March 2016

**Amarinth proves that holidays are no barrier when BASF
required a new pump in an emergency**

Amarinth, a leading company specialising in the design, application and manufacture of centrifugal pumps and associated equipment to the Oil & Gas, petrochemical, chemical, industrial and renewable energy markets, has proven that holidays are no barrier to ensuring process plants are kept running by quoting, manufacturing and supplying a stainless steel pump to BASF despite the Christmas and New Year shutdown across the United Kingdom.

When a former Girdlestone pump at a BASF chemical plant in Bradford, which is one of the largest and most productive single site chemical plants in the United Kingdom, failed two days before Christmas with no replacement available, BASF contacted Amarith for emergency support.

The BASF site manufactures products used to enhance industrial processing in various industries such as papermaking, mining, oil extraction, textiles and wastewater treatment and these require the pumping of acrylamide. Working with BASF, Amarith was able to draw on its experience to produce a quotation the same day to provide a suitable replacement for the failed Girdlestone unit comprising of a bare shaft pump manufactured in 316 stainless steel to ISO15099 specifications.

– MORE –

With the Christmas period well underway and much of the UK shut down for two weeks, Amarith used its influence across a well-established supply chain to source the necessary components and accelerate their delivery. Drawing on its own operational agility, Amarith was then able to assemble and test the pump at its premises in Rendlesham, Suffolk and deliver it directly to the BASF site.

In just a few weeks from the initial contact, BASF had commissioned the new Amarith pump at the Bradford plant, thereby ensuring downtime was kept to a minimum during the Christmas period.

Oliver Briggishaw, Managing Director of Amarith, commented: “We are very conscious that many of our clients operate 24/7 and so we have in place procedures for responding to emergencies such as this, whenever and wherever they occur. The Christmas and New Year period can be particularly challenging in the United Kingdom and so we are delighted that we were able to manufacture and deliver the required pump successfully to BASF in such a timely manner.”

The Amarith ISO15099 bare shaft pump ready for delivery to BASF

NOTES TO EDITORS:

Founded in 2002, Amarith has harnessed the skills, creativity and passion of people who have worked in the pump industry for many years. Amarith delivers world-leading expertise in the design, application and manufacture of centrifugal pumps and associated equipment to ISO, ANSI & API standards, primarily for the industrial, chemical & petrochemical markets. Their portfolio includes:

- **Pumps:** Horizontal and vertical API 610 pumps, chemical and industrial pumps, many of which are interchangeable with the Girdlestone pump ranges, eliminating the need for expensive modifications when replacements are required.
- **Pressure Vessels:** Protect System Plan 52 and 53A and 53B sealant systems with inbuilt condition monitoring for pumps and mixers that are suitable for Safe area up to Zone I.
- **Spares & Service:** High quality, fast lead-time re-engineered spare parts to improve performance and extend pump life, including many which are directly interchangeable with the Girdlestone pump ranges.
- **Packages & Modules:** Condensate Recovery Units manufactured for Spirax Sarco incorporating the innovative Ci-Nergy intelligent variable speed control system, plus bespoke packages & skids built to order.
- **Business Systems:** state-of-the-art e-commerce technologies that deliver 24/7 support enabling customers to select pumps and place orders on-line and then track every stage of manufacture through to delivery, any time, anywhere in the world.

The company operates globally from its base in Rendlesham Suffolk, United Kingdom and has a customer base of world-leading companies, including BP, Shell, ExxonMobil, GlaxoSmithKline, Pfizer, Spirax Sarco, Diageo, AMEC, Fluor and Halliburton.
