

Superior Tube and Fine Tubes make three key sales management appointments

US-based Superior Tube and UK-based Fine Tubes, global leaders in precision tubing for critical applications, are pleased to announce three key additions to their sales management team. Mark A Boyle has been appointed to the position of Global Aerospace Market Manager and will be based at Superior Tube's head office in Collegeville, PA, as will Andrew Millett who has been named Sales Manager for the Americas, while Matthew Jablonsky joins as Regional Sales Manager, based in Houston, TX.

Reporting to Brian Mercer, Director of Global Sales & Marketing, Boyle will be responsible for directing strategy and driving the growth of the companies' global aerospace business. He joins with 20 years of aerospace experience gained in a variety of positions, including with Rolls-Royce where he was Vice President, Business Development, for all MRO facilities in the Americas and, later, managed its Global Helicopter Engine Market's Customer Support function. After leaving Rolls-Royce, Boyle worked with TIMET, a major titanium producer, as Commercial Director and subsequently Director of Sales, Marketing and Business Development at Spirit Aerosystems. Most recently Mark has worked for Greene, Tweed, a specialist manufacturer of thermoplastic composite products. A Chartered Management Accountant (CMA), Boyle also holds a Business Management degree from Glasgow Caledonian University.

Speaking of his new role, Boyle commented: "*Superior Tube and Fine Tubes have an enviable reputation built over many decades for producing world-class tubing solutions for aerospace, nuclear and other key industries. I look forward to sharing our strong value proposition with our aerospace community.*"

Andrew Millett also reports to Brian Mercer and is responsible for developing and managing the execution of a sales strategy that expands the footprint of Superior Tube and Fine Tubes in the United States, Canada and South America. An accomplished sales manager who has worked in both North America and Europe, Millett was previously Medical Accounts Manager for Johnson Matthey, a UK-based multinational. Prior to that, he was the Commercial Market Manager at Plymouth Tube Co. He has a Bachelor of Science degree in Mechanical Engineering and holds a Master of Business Administration degree from Drexel University.

"*I'm very pleased to join Superior Tube and Fine Tubes. Both have excellent reputations for innovation and product quality. I'm really looking forward to contributing to increasing their market share across the Americas,*" Millett said.

As Regional Sales Manager, Matthew Jablonsky will develop relationships with existing and prospective customers from across the Houston region and promote the added value that Superior

Tube and Fine Tubes offer to their clients. A senior sales professional with over 10 years of experience and a specialization in technical products for the energy sector, he was most recently responsible for Outside Sales at PAC Stainless, distributors of stainless steel tubes, pipes and fittings. He has a Bachelor of Business Administration degree from Texas A&M University.

"I am very excited and honored to join the team at Superior Tube and Fine Tubes. My goal is to deeply penetrate the U.S. Gulf Coast oil and gas market and further educate our customers on our expertise and capabilities. I look forward to growing our footprint in this dynamic marketplace, and having a noticeable impact on the sales volume in this region," Jablonsky commented.

Brian Mercer added: *"We're delighted that Mark, Andrew and Matthew have joined the Superior Tube and Fine Tubes sales team. Each has a depth of experience that we feel certain will prove to be of great value to us as we continue to expand our business, both in the Americas and globally, across all of our key markets."*

Superior Tube and Fine Tubes are part of AMETEK Specialty Metal Products, a division of AMETEK, Inc., a leading global manufacturer of electronic instruments and electromechanical devices. Both companies have a long history of developing and manufacturing high-performance tubing for some of the most demanding applications across a range of industries, including aerospace and defence, nuclear power, oil and gas, chemical processing, and medical.
