

Equalizer range distributed by Shaw Hydraulics.

Innovative Equalizer flange tools under the trusted Enerpac brand and distributed by Shaw Hydraulics Ltd.

The world-leading Equalizer flange maintenance tools joined the Enerpac portfolio in 2019. The same patented product innovation, safety and reliability is available under the Enerpac brand. Find your nut splitters and cutters, flange pulling, spreading and flange alignment tools with the added training, application support and service from the Shaw Hydraulics Ltd.

Equalizer Flange Tools

Equalizer tools provide a safe, cost effective and simple solution for your flange alignment, flange spreading and flange pulling applications. The Equalizer range of tools have been developed to simplify the maintenance of flange joints. The tools use mechanical and hydraulic power for separating, aligning and connecting small, medium or large flanges joints.
