New additions to the Wilson Track Mount Fleet

As we continue to expand our Track Mount fleet, Wilson have taken delivery of a further two specialist spiders this month - the Falcon FS290 and the Bluelift C22/11.

Falcon FS290

Reach Height: 29.00m
Maximum Outreach: 13.00m

The FS290 is the ideal spider lift for high internal or narrow access projects such as atrium work and facilities management.

Key Features:

- Wheeled spider platform
- Variable jacking - Set up in small enclosed areas
- Adjustable double jib - Under, over and between obstacles

Bluelift C22/11

Reach Height: 21.00m
Maximum Outreach: 10.8m

Ideal for sensitive environments such as hospitals and residential areas due to its zero emissions and low operating noise as well as shopping centres and atriums

Key Features:

- Lithium powered (which can operate for 6-8 hours on a single charge).
- 0.91m stowed width - ideal for narrow access jobs
- Minimal point loadings - ideal for fragile floors - we can also supply larger spreader pads if needed

Both machines are now in fleet and ready for hire.

For further details you can view the manufacturer's specs here, or call the Wilson team on **0844 288 9338** for more information.

Please print this email and the document for those without email access.
