**FOR RELEASE APRIL 1<sup>st</sup> 2024**

## Introducing "MicroNiftys" from Niftylift - Powered by Pym Particles!

*In the world of miniature aerial work platforms, it's not the size of the Niftylift in the fight; it's the size of the fight in the Niftylift!*

### The Dawn of a Miniaturized Era

Here at Niftylift Ltd, we've always prided ourselves on pushing the boundaries of what's possible in the world of aerial work platforms. Our commitment to innovation and compact design has led us to a groundbreaking discovery that seems straight out of a Marvel Avengers movie. In an extraordinary leap in technology—and with a bit of inspiration from Ant-Man—we're thrilled to announce our latest product line: The MicroNiftys, powered by none other than real-life Pym particles!

### When Science Meets Superhero Ingenuity

Directors | F.R. Bowden, J.P. Keely, S.M. Beadle, S.A. Redding, S.D. Beckwith  
Registered In England No. 01264184 | VAT No. GB 433 0071 03

**Niftylift Ltd** | Chalkdell Drive, Shenley Wood, Milton Keynes, MK5 6GF, England

Service Department | **T:** +44 1908 857899 | **F:** +44 1908 227460

In our relentless quest to make our lifts even more compact and versatile, our R&D team stumbled upon a batch of Pym particles. Yes, you read that right—the very particles used by Dr. Hank Pym himself to shrink or enlarge anything they touch. After months of rigorous testing (and ensuring no ants were harmed in the process), we've successfully harnessed this technology to shrink our Niftylifts to micro proportions.

### **MicroNiftys: Small Size, Giant Performance**

Imagine carrying a Niftylift in your backpack, zipping through congested urban jungles, or navigating the tightest of industrial corridors. With MicroNiftys, that's not just possible—it's your new reality. These pint-sized powerhouses can be easily transported in the palm of your hand and resized on the spot to tackle any job, no matter the height or complexity.

Gone are the days of worrying about transportation logistics or manoeuvring through narrow passages. Our MicroNiftys ensure that you're always ready for action, just like your favourite Avengers. And when it's time to get to work, a simple press of a button is all it takes to bring them back to full size, ready to reach new heights (literally).

### **The Marvel of Compactness**

In the spirit of Ant-Man, we've proven that great power can indeed come in small packages. While our MicroNiftys might be small enough to dodge a raindrop, their performance is anything but minuscule. This April, we're celebrating not just our sense of humour but also our unwavering dedication to innovation.

Our MicroNiftys are a testament to Niftylift's ongoing mission to offer unparalleled compactness and efficiency. They provide a solution that's about overcoming physical barriers and breaking the limits of what's possible in aerial work platforms.

### **Join the Miniature Revolution**

So, as we roll out our MicroNiftys, we invite you to think smaller to achieve bigger. Whether you're navigating the quantum realm or just trying to squeeze through a tight spot on the job site, remember: with Niftylift, the only limit is your imagination (and maybe the laws of physics, but we're working on that).

Stay tuned for more updates on our miniaturized marvels. And remember, in the world of miniature aerial work platforms, it's not the size of the Niftylift in the fight; it's the size of the fight in the Niftylift!

*Disclaimer: Please check the date before contacting customer service to order your very own MicroNifty. Our customer service team is equipped to handle many queries, but requests for Pym particles might just shrink their patience.*
