

Dear Customer,

Rapid Welding are proud to announce the Welding & Fabrication eLearning DVD, which gives learners the opportunity gain a theoretical understanding of and study each of the modern welding & cutting processes in the comfort and flexibility of their preferred learning location. This software provides a foundation to progress into further practical learning.

A New Era in Weld Training

This eLearning package is more than just a simple Welder Training DVD, it provides a comprehensive introduction to all other associated skills required to support the welding process. The Performing Engineering Operations (PEO) module covers Health & Safety, Personal Protective Equipment, Safety Signs, Control of Hazardous Substances, Working at Heights, basic First Aid, Manual Handling, Risk Assessments, Fire Protection, Electrical Safety, Working As A Team and Communicating Technical Information. Other modules include Engineering Materials, Metal Fabrication & Cutting and Quality Control. Each module is completed with an overview and short knowledge test. Once all modules are completed you can apply your newly gained knowledge in a fully interactive 3D workshop where you are given a set of realistic scenarios to experience each welding process.

Priced from £99, [Click here to view this exciting new development on our Website](#)
