

SHU FORMULA STUDENT RACING TEAM

Hague Fasteners are thrilled to be working alongside the team at Sheffield Hallam University on their 2018 Formula Student Racing project and proudly feature as a partner sponsor on the vehicle and at their launch event.

Hague Fasteners were approached by the Sheffield Hallam University Racing Team back in March and jumped at the chance to join the team on their quest to Formula Student Racing success in the 2018 season.

The team were thrilled with the quality of the customised fasteners produced and were pleased to take Hague Fasteners on board as one of their new [partners](#).

- easycomposites**
- zircotec**
- Proformance Metals**
- demon weeks**

Hague Fasteners have worked with the exciting young engineers to reduce the weight of their vehicle by producing some customised Titanium Wheel Studs for the 2018 vehicle lightweight wheel hubs which was unveiled at the weekend.

The team have been thrilled with the end result as they enter their 5th consecutive year of competition. The race team students are selected from various courses and backgrounds and runs alongside their dedicated racing society. A top level principal has built a team of masters students that each manage an individual area of the cars development.

The formula student event takes place at Silverstone between the 13th & 15th July 2018 and is a fantastic racing event. For more information or to buy tickets for the event, visit <http://www.silverstone.co.uk/events/formula-student/>

Keep up to date with the Racing Teams Progress on the SHU Racing Website <https://www.shuracing.co.uk/>, we wish the team the best of success at Silverstone later this month, everyone at Hague Fasteners will be cheering you all on.
