

Explore battery test chambers at the Battery Tech Expo 2022

It's that time of year again! We invite you to join us at the Battery Test Expo at Silverstone on 12th May 2022.

The Battery Tech Expo brings together hundreds of industry professionals, showcasing the latest technologies and innovations in the field along with a speaker agenda of high value informative presentations.

Unitemp, exhibiting on stand B43/B44, will be demonstrating the exciting [Espec BTC series](#), dedicated temperature chambers for battery charge / discharge testing, as well as our [AR series](#) featuring a wide temperature and humidity control range and our [Platinous J series](#) environmental chambers which come in a wide variety of sizes and options to meet your specific environmental testing requirements.

As batteries increase capacity and volume to meet the ever-increasing demand for Electric Vehicles, manufacturers need increasing confidence that the equipment needed to produce and test these vital components is fit for purpose.

The NEW Espec BTC Series, on display at the show, are dedicated chambers specifically designed for the safe and reliable testing of rechargeable battery charge and discharge applications. Designed with safety as a top priority, the BTC is equipped with a large, reusable pressure relief vent that safely relieves pressure in the event of a battery explosion. Additional safety devices can also be selected and added as needed to meet most application demands.

We can't wait to see you and hear about what your company has planned. Stop by and see us on Stand B43/B44!
